

## EDUCATION

<b>Lexington, KY</b>	<b>University of Kentucky</b>	<b>Expected: May 2023</b>
<ul style="list-style-type: none"><li>- <b>Major:</b> Computer Science, Mathematics B.S. (GPA: 3.87)</li><li>- <b>Key Courses:</b> Linear Algebra, Calculus 1-4, Engineering Programming, Physics I, Programming in C, Oceanography, Frontiers in Artificial Intelligence, Algorithms and Data Structures</li></ul>		

## EMPLOYMENT

<b>Controller Integration Engineering Co-op</b>	<b>Intel Corporation</b>	<b>Oct. 2020 – Present</b>
<ul style="list-style-type: none"><li>- Wrote automated test simulations for the Simics platform in C and Python</li><li>- Debugged and validated various processor configurations simulated via FPGA</li><li>- Mastered the Linux kernel to be able to debug, validate, and test processor firmware</li></ul>		
<b>Smart Manufacturing Research Assistant</b>	<b>University of Kentucky</b>	<b>Jan. 2020 – May 2020</b>
<ul style="list-style-type: none"><li>- Developed a convolutional neural network for part prognosis in additive manufacturing in Pytorch</li><li>- Wrote a grant proposal for an undergraduate sustainability research grant</li><li>-</li></ul>		
<b>Software Engineer</b>	<b>University of Kentucky</b>	<b>May 2019 – July 2020</b>
<ul style="list-style-type: none"><li>- Improved faculty data comprehension by creating a data visualization web app in PHP, JavaScript, and SQL</li><li>- Automated faculty job search process by using Python to parse new applicants, saving 2 hours daily</li><li>- Integrated Docker into applications department wide while co-leading a project to revitalize department DevOps</li><li>- Integrated new code review automation and management system using version control and GitLab</li></ul>		

## EXTRA-CURRICULAR

<b>Embedded Systems Team</b>	<b>UK Solar Car Team</b>	<b>Aug 2019 – Present</b>
<ul style="list-style-type: none"><li>- Helped with development of the embedded systems within the car such as RTOS, sensors, and microprocessors</li><li>- Contributed to the development of the real-time operating system</li><li>- Improved reliability of steering wheel by designing detachable throttle/brake daughter boards using Eagle PCB</li></ul>		
<b>Biomedical Imaging Lab Assistant</b>	<b>University of Kentucky</b>	<b>Mar. 2020 – Oct. 2020</b>
<ul style="list-style-type: none"><li>- Assisted with optimization of imaging device that renders real-time model of patient blood flow / hemodynamics</li><li>- Optimized computation time of imaging device by over 300% using CUDA GPU acceleration in MATLAB</li><li>- Developed a LSTM recurrent neural network in Pytorch that mapped cerebral blood flow to intracranial pressure</li></ul>		
<b>Bioinformatics Research Assistant</b>	<b>University of Kentucky</b>	<b>Aug 2018 – Dec. 2018</b>
<ul style="list-style-type: none"><li>- Reduced dependency on legacy-based platforms by integrating Linux Fedora 28 into the lab infrastructure</li><li>- Spearheaded the development of a python implementation of the open-source software “BioFabric”</li><li>- Used Python to analyze sample genome datasets and visualize them using BioFabric</li></ul>		

## PERSONAL PROJECTS

<b>Mandelbrot Fractals in OpenGL:</b> <a href="https://www.brennengreen.dev/blog/posts/1/">https://www.brennengreen.dev/blog/posts/1/</a>
<ul style="list-style-type: none"><li>- Created interactive visualizations of the Mandelbrot Set fractal in the core profile of OpenGL</li><li>- Used OpenGL Shading Language (GLSL) to create efficient and aesthetically pleasing shaders</li><li>- Used C++ to create an interactive program that allowed the user to explore the fractal in real time</li><li>- Utilized: C++, GLSL, OpenGL, Shader Development, Graphics Pipeline, Simulation</li></ul>
<b>GoList (Craigslist Web Scraper in Go):</b> <a href="https://github.com/brennengreen/golist">https://github.com/brennengreen/golist</a>
<ul style="list-style-type: none"><li>- Implemented a web scraper that scrapes posting data from a craigslist category</li><li>- Used Golang's PostgreSQL implementation to categorize all postings in a SQL database</li><li>- Maintained an active server for utilizing the web scraper and database using Heroku</li><li>- Utilized: Algorithms, SQL / PostgreSQL, Databases, Heroku, Twilio, Go, and Web Scraping</li></ul>
<b>Ditto (Discord Media Bot Written in Python):</b> <a href="https://github.com/ditto-dev-team/ditto">https://github.com/ditto-dev-team/ditto</a>
<ul style="list-style-type: none"><li>- Used Python to design the backend to safely access the bot's file structure and store/access media files</li><li>- Used Heroku to properly sense when the bot is in use as to save time and money when hosting the bot</li><li>- Utilized: UNIX File System, Python, Heroku, Git Version Control, Project Management</li></ul>
